

Get more from your heat pump with the **Passiv Smart Thermostat**

Heat pumps aren't like gas boilers.

They don't operate at the same high temperatures and are most efficient and cost effective when they run low and slow.

Standard heating controls aren't designed for this. They switch heat pumps on and off too often, leading to uneven comfort and higher bills.

The Passiv Smart Thermostat is a smart controller for heat pump that improves your comfort while lowering your bills

How is the Passiv Smart Thermostat different?

It is the only smart thermostat designed specifically for controlling heat pumps.

Unlike other thermostats, it directly controls the heat pump's flow temperature for maximum efficiency, perfect comfort and lower bills.

By optimising to time of use tariffs and solar PV, the Passiv Smart Thermostat can reduce your bills by 30%

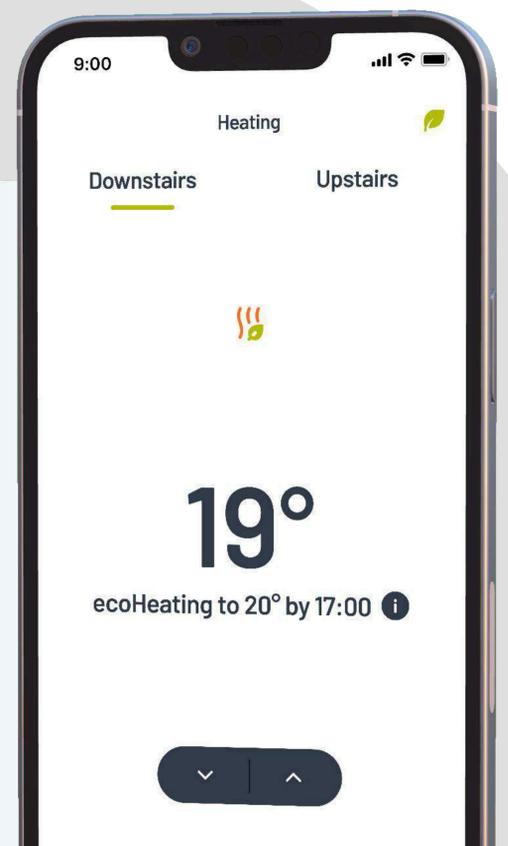

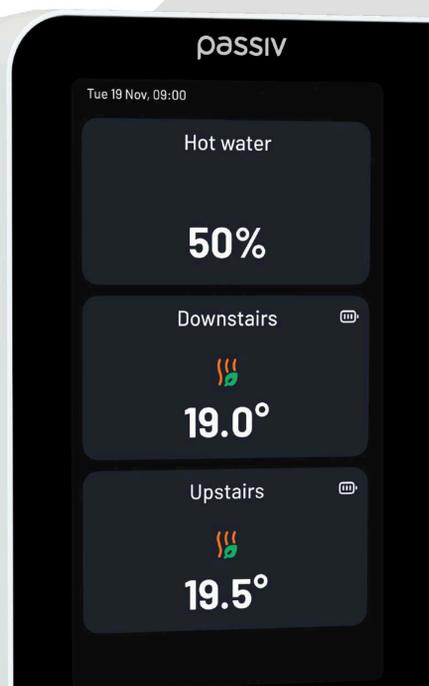

It can reduce your heating bills.

The Passiv Smart Thermostat factors in local weather forecasts, the home's thermal performance, electricity tariffs and solar PV to reduce your heat pump bills.

And improve your comfort.

With full control from the in-home controls or via the app, the Passiv Smart Thermostat delivers stable consistent indoor temperatures.

It's easy to use and simple to manage your heating. Just set when you want to be warm and the Passiv Smart Thermostat will do the rest.

Three reasons to install the Passiv Smart Thermostat

1 30% Lower Bills

- ✓ Improves the efficiency (SCOP) of your heat pump by 17%, as verified by the Energy Saving Trust
- ✓ Automatically optimises to your electricity tariff - just select your tariff in the Passiv app
- ✓ Optimises to rooftop solar PV generation without any additional monitoring equipment

2 Effortless Comfort

- ✓ Runs your heat pump low and slow to maintain stable, consistent comfort
- ✓ Uses local weather forecasts for perfect preheating

3 Simpler Controls

- ✓ In-home controls designed for a heat pump - full control even without an internet connection
- ✓ Control heating and hot water from anywhere with the app

TRY IT OUT

Download the Passiv app
and try demo mode!

"The Passiv Smart Thermostat has reduced my bills by 40% and keeps my home consistently warm.

My tariff is already programmed in, so I don't have to tell the heat pump when to run to take advantage of cheap electricity. It's simple to use, and the app lets me control it from anywhere in the world.

It's turned my heat pump into everything it was promised to be."

Carilyn, Tunbridge Wells
